**11.40-12.30** THE ROLE OF THE BANKER? HOW WILL AI TRANSFORM THE COMMODITY BASE BUSINESS?

**Automation of repetitive tasks (RPA) and client self-service capabilities are part of the benefits of AI. But automation, of course, is a dual-edged sword. It can take over processes that represented much of the value the professional historically provided.**

**Think portfolio construction and rebalancing—tasks where robo-advisors have become prevalent.**

**Those same capabilities will be available to competitors, making differentiation based on service excellence alone more difficult. Wealth Management is one of the areas that will see a tremendous amount of disruption with a client facing consequence.**

**What will be the future role of the banks?**

Moderated by Matteo Rizzi, Co-Founder, FinTechStage

Serena Torielli, Founding Partner, Advise Only

Ruth Polacheck, Entrepreneur, CEO & Co-Founder, FinCheck.com

Pau Velando, GM, Strands

**12.30-13.00** FROM TRADITIONAL TO INTELLIGENT TO IMMERSIVE: HOW IS AI TRANSFORMING BANKING?

**From Microsoft's perspective the power of AI will enable banks to transform in these states.**

**Where are these states of banks today? And where are we seeing tangible impact of AI implementation?**

Fabio Moioli, Head of Consulting and Services, Microsoft Italia

**13.00-13.10** WRAP UP & CONCLUSION
